

Credentials Change Request

Should a Golf Club wish to change their competition software provider, any change must be communicated with England Golf, via the relevant change form **(CR004)**, completing section 1 & 2 only.

This ensures that the appointed software provider can communicate with the WHS portal, and a formal credentials request is required in advance of any change date (at least 14 days in advance).

Any request must be completed and returned by a senior person (manager/secretary) at the club. Any request from a software provider directly, will be ignored and not processed.

Process
