

# Stroke Indices

The World Handicap System includes a new recommended approach for the allocation of stroke indices.

While it is not a requirement for club to change from their current Stroke Indices, it may be that they wish to review their application, and this would now be done using the new process.

The full process is outlined in the Rules of Handicapping Appendix E.

However, some of the information is not currently available to clubs. So to assist, Clubs can request the recommendation based on Appendix E.

To request this clubs must complete the **Application for WHS Stroke Index (CR005)**.

## Process
